

Translation

"**Haber 660** by Polish boat manufacturer Haber Yachts is a small, yet large boat. With a length of just 6,60 meters, it is equipped with everything indispensable for the sailing trip; and not only at short distances. The 660, in fact, also meet the design requirements for category B and its solid shape, reminiscent of a motor sailer, permit usage in conditions unusual for a boat of this size. Below the deck there is, in fact, place for a double berth in the bow. There is yet another berth available when lowering the dinette table.

There is no lack of full standing height in the kitchen and the toilet. While sailing, it surprises by performing the best when wind increases and seas gets high, conditions in which many other boats of this size are forced to return to the harbour.

It is available in sloop or cutter rigging. The 14 hp inboard engine allows for a favourable average fuel consumption rate.

Notwithstanding its dimensions, the Haber shows meticulous care in design, with sophisticated and never superficial solutions. With a basic price starting from about 40,000 €, including VAT and freight, it currently represents an optimal means to enter the adventure of sailing and the realm of leisure".
